

Treasury Monthly Budget Report – December 2022

Summary

In December, the total net operating balance for the Government, including donor funds, was a deficit of VT 1,399.5 million. The year-to-date total net operating balance for the Government, including donor funds, recorded at the end of December was in deficit at VT 1,315.7 million which is equivalent to -1.1 per cent of GDP.

The net operating balance for Government excluding donor funds in December was a deficit of VT 756.1 million. To date the total net operating balance for the Government operations, excluding donor funds, was a deficit of VT 3,183.0 million which is equivalent to – 2.6 per cent of GDP.

Government Revenue

During December, Government revenue was VT 4,110.4 million which is 31.1 per cent higher than revenue forecast of VT 3,135.0 million. This is mainly due to higher collection than forecast from VAT, Excise Other Imports, Not Elsewhere Specified Import t Duties, Budget Support and Honorary citizenship program in December. Total Government revenue (excluding donor financing) reached VT 29,914.5 million at the end of December 2022. This represents 86.8 per cent of the revised budget target of VT 34,464.2 million and is 9.4 per cent lower than what was collected during the same period in 2021 (VT 33,010.1 million). This is partially due to the COVID-19 pandemic, border closure and community transmission lockdown. While borders have re-opened since 1st of July, revenue growth is still slower than expected.

Tax collection still makes up a major part of Government revenue recording VT 18,557.1 million up to December 2022. VAT, the largest individual tax revenue stream, brought in VT 9,262.7 million revenue up to December. This represents 95.5 per cent of its budget target of VT 9,702.5 million and 26.9 per cent more than VT 7,300.5 million collected during the same period in 2021. However, VAT collection could have been lower without the implementation of the policy stimulus that has helped to mitigate the effects of the slowdown.

Taxes on international trade and transactions, comprised of import and export duties, are the second major tax revenue stream, recording VT 3,976.1 million in 2022, which is 7.7 per cent more than its budget target of VT 3,690.7 million. This is 0.3 per cent more than the VT 3,962.9 million collected at the end of December 2021. Another major source of Government revenue is excise tax, which recorded VT 2,727.1 million at the end of December. This is equal to 64.4 per cent of its 2022 budget target of VT 4,235.0 million, and is 11.3 per cent lower than the VT 3,073.0 million collected during the same period in 2021. Revenue from property taxes totalled VT 451.2 million in December, which represents 92.8 per cent of its 2022 revised budget target of VT 486.1 million.

Vanuatu also receives budget support from its development partners totalling VT 1,009.1 million¹ to fund 11th EDF programs, the 3rd economic stimulus package and at the same time prepare and respond to COVID-19 community transmissions. This represents 71.4 per cent of the budget target of VT 1,414.1 million.

As of the end of December, collections of other Government revenue (predominantly fees and charges) totalled VT 10,378.2 million, which is 81.5 per cent of its budget target of VT 12,731.6 million. The main component of this category is revenue from the Honorary Citizenship Programs (comprising the Vanuatu Development Support Program (VDSP) and the Vanuatu Contribution Program (VCP)) collecting VT 8,483.1 million at the end of December, representing 87.8 per cent of the budget target of VT 9,659.6 million and is 34.1 per cent lower than the VT 12,871.4 million that was collected up to December last year.

¹ VT 565.4 million from Asian Development Bank (ADB), VT 424.6 million from 11th EDF and VT 19.2 million from the Australia Department of Foreign Affairs and Trade (DFAT).

Government Expenses

Government expense recorded VT 4,866.5 million in December, which is 49.7 per cent higher than budget forecast of VT 3,250.2 million. The majority of overspending compared to budget forecast in December was mainly from Permanent wages, Building repairs and Maintenance and Operating grant. Government expenses (excluding donor financing) recorded VT 33,097.5 million at the end of December 2022, against a revised annual budget of VT 35,167.9 million. This denotes 94.1 per cent of the revised 2022 budget target and is 0.2 per cent less than the VT 33,169.3 million spent in the same period in 2021.

Government expense is slightly below budget target. However, there are some major overspending expenditure items that have spent over their annual budget target, which includes:

- Acting Allowances (VT 444.3 million against zero annual budget target)
- Special Allowances VT 378.3 million against an annual budget target of VT 193.8 million)
- Leave Expense (VT 154.5 million against zero annual budget target)
- Local Accommodation (VT 361.7 million against an annual budget of VT 204.5 million)
- Other Fees (VT 585.9 million against an annual budget of VT 236.1 million)
- Court Costs (VT 238.4 million against an annual budget of VT 58.9 million)
- Building repairs and maintenance (VT 636.8 million against an annual budget of VT 193.9 million)
- Other Suppliers (VT 259.4 million against an annual budget of VT 56.1 million)
- Electricity utilities (VT 458.3 million against an annual budget of VT 350.4 million)
- Termination Payment (VT 1,321.0 million against an annual budget of VT 554.0 million)

Spending on compensation of employees still remains the largest component of Government expenses, recording VT 17,124.4 million at the end of December (or 97.3 per cent of the annual budget target of VT 17,608.0 million), which is 3.3 per cent more than the VT 16,571.0 million spent in the same period in 2021, partially due to the implementation of new structures with increasing size and salary scales and special allowances pay out.

The next largest category of Government expenses is the use of goods and services, which recorded a total of VT 7,898.7 million in December. This is 90.2 per cent of the revised budget target for 2022 (VT 8,761.1 million) and represents 13.6 per cent more than the VT 6,952.7 million recorded during the same period in 2021. The increase is due to 2022 supplementary being higher than 2021 supplementary.

The third largest category of Government expenses is grants, with a total of VT 3,258.4 million spent at the end of December, which is 89.3 per cent of its annual budget target of VT 3,648.1 million. This is 4.9 per cent lower than spending on grants during the same period in 2021 (VT 3,427.3 million).

The remaining categories of Government expenditure include interest, social benefits, subsidies, and other expenses. Up until the end of December, spending on interest reached VT 999.3 million, equal to 40.0 per cent more than the annual budget of VT 713.8 million. This is 10.4 per cent more than the amount spent during the same period in 2021 (VT 905.4 million). Expenditure on social benefits up to the end of December reached VT 1,321.5 million, 68.1 per cent more than the budget target of VT 785.9 million and 114.9 per cent more than the amount recorded during the same period of 2021 (VT 615.0 million) mainly due to the public service commission's decision to increase severance payout to two months. Total spending on subsidies, which includes the wage subsidy scheme, school fee subsidy, copra subsidy and shipping subsidy, up to the end of December came to VT 319.4 million, which is 29.9 per cent of the revised budget of VT 1,067.1 million in 2022 and represents 22.1 per cent lower than the VT 410.1 million recorded during the same period in 2021 mainly due to decrease spending on the shipping subsidy payment. Other expenses totalled VT 2,175.8 million up until the end of December, representing 84.2 per cent of the annual budget of VT 2,583.8 million and 49.3 per cent lower than what was recorded during the same period of 2021 (VT 4,287.7 million).

Government Acquisition of Non-Financial Assets

Net acquisition of non-financial assets recorded VT 2,493.8 million at the end of December, representing 78.0 per cent of the annual budget target of VT 3,196.2 million and 59.5 per cent more than the net amount of VT 1,563.3 million during the same period in 2021. A major reason for the increased spending is mainly due to more budget have been allocated to capital projects in 2022 which includes the NPPs for the roads and increased spending on additional General Equipment and Computer Equipment for COVID-19 preparedness and responses in line with the Government agencies Business Continuity Plan.

Government Transactions in Financial Assets and Liabilities

So far this year, the Government has amortized a total of VT 2,296.8 million worth of external loans to JICA, China, the Asian Development Bank (ADB), and the International Development Association (IDA). In addition, the Government also amortized VT 1,111.9 million worth of domestic bonds and undertook a drawdown of VT 3,456.0 million worth of domestic bonds.

Development Budget Highlights²

In terms of development financing, the Vanuatu Government continues to extend its sincere gratitude to its development partners. As of the end of December, the Government had received VT 7,474.5 million in project grants from development partners, representing 65.7 per cent of the budget target of VT 11,374.0 million. The greatest revenue was from the Australian Government (VT 1,660.7 million), the World Bank (VT 1,379.0 million), the Government of China (VT 673.1 million) and the New Zealand Government (VT 484.1 million). The Vanuatu Government continues to gratefully acknowledge the support of its development partners.

In contrast, under development financing, spending on projects grants up to December reached VT 5,607.2 million. This represents 51.8 per cent of the revised budgeted target of VT 10,818.5 million and is 10.7 per cent higher than the amount of VT 5,066.0 million that was spent on project at the end of December in 2021.

² Department of Finance and Treasury is working on improving the collection of information regarding loan disbursements throughout the year, for inclusion in the monthly budget report. The department is targeting the budget report for December to detail total disbursements for 2022.

Key Terminology

- **Net operating balance** is equal to revenue minus expenses and indicates whether the government is able to sustain its current level of operations.
- **Net lending/borrowing** is equal to the net operating balance minus net acquisition of nonfinancial assets and is often referred to as the fiscal surplus/deficit. It indicates whether the Government is taking out resources from or giving resources to the economy.
- **Expense** is a decrease in net worth resulting from a transaction.
- **Revenue** is an increase in net worth resulting from a transaction.
- **VAT (Value Added Tax)** is the tax on goods or services collected in stages by enterprises but ultimately charged in full to the final purchasers.
- **Interest payments** and **Grants** are paid on fixed dates as they are payments to external Government entities.
- **Taxes on international trade and transactions** are almost all import duties based on Cost, Insurance, and Freight (CIF) values.
- **Excise** is charged on goods sold in the country regardless of whether they were produced domestically or overseas.
- In terms of revenue from development partners, **project grants** are funds for donor-assisted projects provided by donors, held in the Government's central development fund account.
- **General budget support** is a transfer from donors directly to the Vanuatu Government's national treasury account to finance the Government budget. Funds transferred as budget support are managed in accordance with the Government's normal budgeting and financial management process and there is relatively little specification as to expenditure purposes or priorities by donors. This revenue still comes under grants, but is on the table called 'Statement of Government Operations Excluding Donors'.
- The **Government operations funded by donors** represent only revenue (in the form of project grants) and expenses to and from the Government's central development fund account. Some donors continue to operate outside the Government system so these numbers understate the total value of donor support to Vanuatu.
- **Net acquisition of domestic financial assets** is positive when the Government accumulates cash reserves and negative when it draws down its reserves or goes into its overdraft.
- **Net incurrence of domestic financial liabilities** is positive when Government bonds are raised through auction and negative when they are retired (paid out).
- **Net incurrence of external liabilities** is positive when the Government draws down external loans and negative when principal on these loans is repaid.
- **Compensation of employees** figures follow the Government paydays. The Government runs a fortnightly pay system.

Annex 1: Government Revenue Trend

Government revenue (excluding Donor Funds) collected in December was higher than the budget target figure predicted through cash flow analysis of previous fiscal years (Figure 1). This is mainly due to higher collection than forecast from VAT, Excise Other Imports, Not Elsewhere Specified Import Duties, Budget Support and Honorary citizenship program in December. Figure 2 shows Cumulative revenue trend against budget target

Figure 1

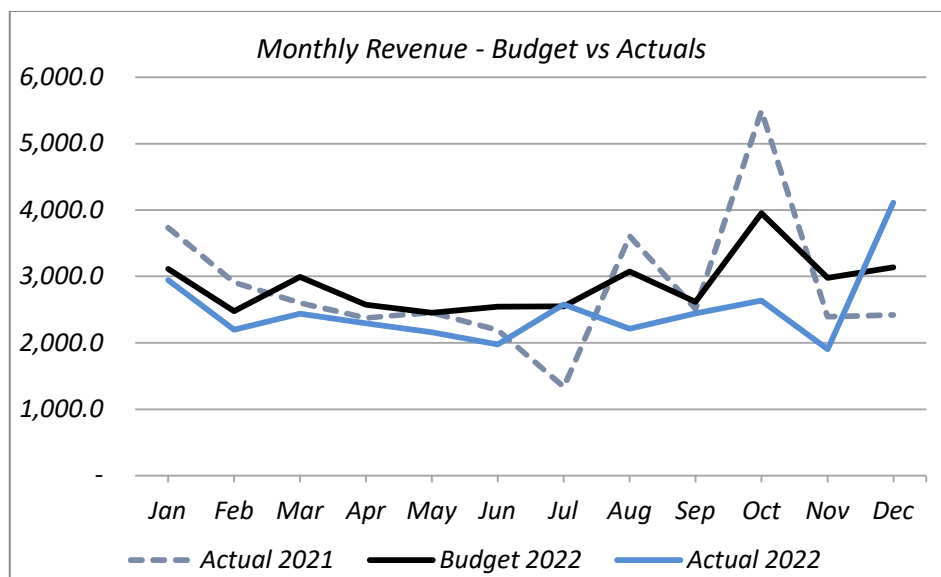

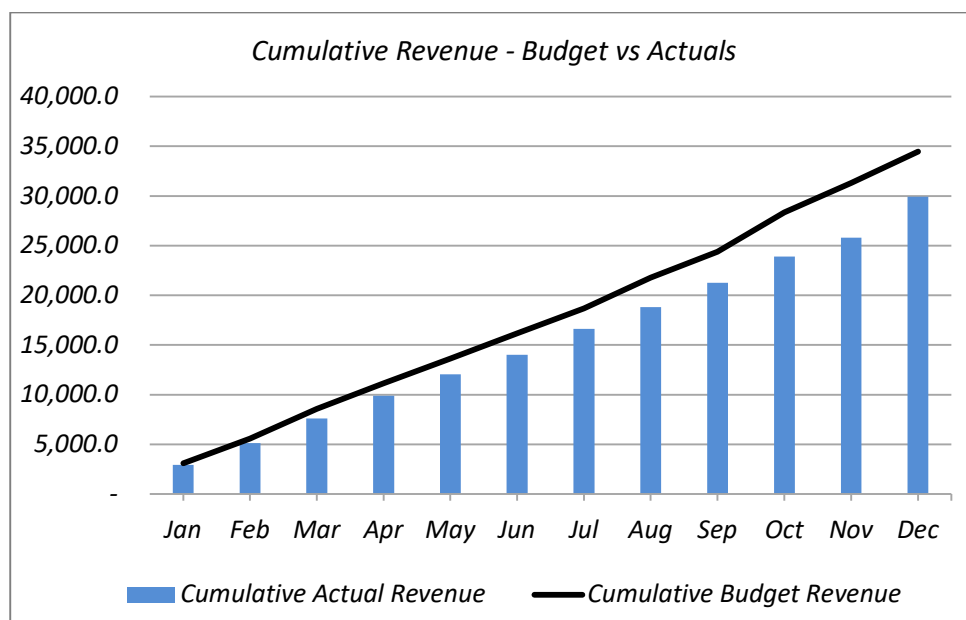

Figure 2

Annex 2: Expenditure Trend

Government expenditure (excluding donor funds) in December 2022 was higher than predicted through cash flow analysis of previous fiscal years, as shown by Figure 3. The majority of overspending compared to budget forecast in December was mainly from Permanent wages, Building repairs and Maintenance and Operating grant.

Figure 4 shows cumulative expenditure trend against budget target.
