D30 - Office of the Prime Minister

Overview

The Office of the Prime Minister (OPM) provides guidance on matters of national importance and leads the planning and implementation of policies for the development and progress of Dominica. The OPM establishes the Government of Dominica's overall growth strategy and sets national priorities.

The OPM advocates a *National Reset*, which prioritizes people centered, inclusive policy and decision-making, giving priority to increasing citizen engagement, improving communication and fostering greater transparency and accountability. The Office is focused on building resilience; enhancing communities; strengthening the Dominican society and bolstering the economy against external and environmental shocks.

The Office of the Prime Minister promotes six results areas for the creation of a climate-resilient Dominica, namely:

The building of Strong Communities;
A Robust Economy;
Well-planned and Durable Infrastructure;
Enhanced Collective Consciousness;
Strengthened Institutional Systems; and
Protected and Sustainably Leveraged Natural and Other Unique Assets.

The Office of the Prime Minister is spearheading a number of major national projects aimed at developing stronger communities and families as well as resilient homes and public infrastructure; and promoting wealth creation and financial resilience among citizens. Among major initiatives, the Future Housing Programme offers quality homes to young professionals seeking to achieve economic independence; the Cable Car Project in the Roseau Valley, ongoing Hotel Development such as Tranquility Resorts (Hilton), Anachi Resort and Spa (Marriott) and the construction of a Marina in Portsmouth are projected to spur long-term growth in the tourism sector; and the construction of the International Airport in Wesley will improve air access and contribute to sustainable economic development.

The OPM aims to advance government policies, programmes and projects that meet the socio-economic development needs of the Commonwealth of Dominica.

D32 - Ministry of Agriculture, Fisheries, Blue and Green Economy

Overview

The Agricultural Sector has traditionally contributed up to thirty per cent (30%) of national output in the early 1980s throughout which it has been historically defined as the primary production of crops, livestock, forestry, and fisheries, to include food and non-food processing of agriculture produce at the micro and small-scale level.

The sector was dominated by international and regional trade under preferential market treatment and coupled with a tradition of low foreign direct investment (FDI), characterised by a high level of dependence on government spending or public sector investment programmes and remittances to households. As the engine of growth in Dominica, agriculture creates employment, supplies wholesome foods, generates wealth, and maintains socio-economic growth and development, making a significant contribution to rural livelihoods and national food and nutrition security.

However, the economy has transitioned from agriculture and agro-industry to the high value services sector exposing economic vulnerability and volatility compounded by frequent and increasingly catastrophic natural disasters, access to markets, credit, and labour, poor farm road conditions, the incidence of pest and disease infestations, and global economic shocks as war, fuel crises, recessions, global inflation, and delays in delivery on international financial commitments to climate change.

The Ministry of Agriculture, Fisheries, Blue and Green Economy (MAFBGE) is charged with the responsibility to pursue a new target set for the Agricultural Sector to contribute 700 million dollars to national output measured by the Gross Domestic Product (GDP) by 2030.

The Agricultural Sector's performance at the end of 2022 revealed that Agriculture contributed only \$273 M or 16.03% to GDP, – the sector performance however depends a high level of coordination and collaboration and the capacity to address these cross-cutting challenges and to forge intra-sectorial linkages and synergies with a clear long-term vision to increase productivity, profitability, and efficiency.

In pursuit of this target, the Agriculture Transformation Roadmap calls for innovation, collaboration, adoption of modern and climate-smart technologies, and transition towards a “blue and green economy”.

Vision

Transformation of the Agricultural Sector into the leading contributor to economic development through the application of sustainable agriculture principles, scientific knowledge, and modern technologies that leverages our biodiversity, human and natural resources land, soil, and water for building an efficient, productive, self-sufficient, profitable, and resilient Agricultural Sector in Dominica.

Mission

To facilitate and promote the sustainable development of a resilient agricultural and fisheries sector, and blue and green economic investments for the production, processing, and marketing of healthy nutritious foods, value-added products, and the provision of agricultural services that contribute a minimum of 700 million dollars to national output or GDP by 2030.

D33 - Ministry of Education, Human Resource Planning, Vocational Training and National Excellence

Overview

Subsequent to the Establishment of the Education Act in 1997, there has been significant progress in education in Dominica. The widening of access to Education and improvements in the quality of education produced many accomplished citizens who continue to contribute to national development. Dominica's education system is guided by the principle that all citizens can learn and should be afforded access to education.

As reflected in the previous mission statement of the Ministry of Education, the purpose of education '*is to prepare all citizens to live productive lives in a complex and changing society*'. This overarching mandate guided the government's investment in the modernization of the sector. Cabinet's approval and subsequent implementation of a National Curriculum framework in 2006, encouraged renewed efforts to promote Technical Vocational Education and Training (TVET) and Information Communication Technologies (ICTs) in schools. These initiatives provide students on a path to success based on varied educational options.

In the past two decades, the sector has been redefined by the creation of full access to education at the early childhood, primary and secondary levels and significantly expanded access to Tertiary Education.

To educate and prepare all students to live productive lives in a complex and changing society

D38 - Ministry of Environment, Rural Modernisation, Kalinago Upliftment and Constituency Empowerment

Overview

Over the past five (5) years the Commonwealth of Dominica's susceptibility to the impacts on climate change continues to increase in frequency as well as intensity. In August 2015, Tropical Storm Erika severely impacted the country following intense rainfall which caused catastrophic flooding. This resulted in the loss of lives and the displacement of over 1,000 persons. Two years later, Hurricane Maria was responsible for damages and losses over EC\$1.3 billion. These disasters prompted the Government and the international community to take steps to address disaster adaptation and mitigation as a national priority and tackle environmental challenges from a development perspective. As a result of the Government's commitment to resilient development, the Ministry of Environment, Climate Resilience, Disaster Management, and Urban Renewal birthed in April 2018 to champion climate change challenges facing the country. After the General Elections of December 2022, changes were made to the portfolios of the Ministry to create the Ministry of Environment, Rural Modernisation, Kalinago Upliftment and Constituency Empowerment.
