FOREWORD

In accordance with Part 2, Section 5 of the *Public Finance (Control and Management) Act 1997*, Budget Paper 1 for the FY 2026–27 National Budget is presented to Parliament and the people of Naoero. This document is an official publication of the Department of Finance.

The FY 2026–27 Budget is framed around the theme, "Capitalising on the Current High Revenue Environment: Investing in the People and a Productive Future".

While Naoero currently operates from a position of fiscal strength, our macroeconomic strategy demands deep pragmatism. We are navigating a highly uncertain global economic environment marred by heightened policy uncertainty and geopolitical volatility.

Specifically, the ongoing conflicts in the Middle East have driven global oil prices upward, creating a fragile landscape that can easily regress. Any prolonged instability threatens to exert significant fiscal pressure on the Republic by escalating domestic inflation and exposing our supply chains to external shocks.

To responsibly manage these risks, the Government maintains a strict commitment to its fiscal responsibility ratios, focusing on fiscal prudence and building resilient financial buffers to insulate the nation against future contingencies. A comprehensive narrative and detailed analysis of all revenue estimates, expenditure allocations, and fiscal measures are provided within the core budget documents, namely the Budget Speech, Budget Paper 1, and Budget Paper 2. These documents will be published and made publicly accessible on the Department of Finance website.

The compilation of the National Budget is a rigorous, whole-of-government exercise. The Department of Finance extends its sincere gratitude to all Government departments, State-Owned Enterprises, and Government Corporate Entities for their valuable input, collaboration, and dedication during the extended review and formulation processes.

God bless Naoero.

Damon Adeang
Acting Secretary for Finance and Sustainable Development

PART I: BUDGET STRATEGY AND OUTLOOK

BUDGET OVERVIEW

The theme of the FY 2026-27 Budget is "**Capitalising on Stability: Investing in the People and a Productive Future**". Naoero has made significant strides in restoring economic stability despite the persistent structural challenges arising from our remote location and small scale. Close collaboration with development partners has modernized infrastructure, secured reliable access to banking services, and locked in multi-year donor support, alongside greater certainty surrounding the Regional Processing Centre (RPC) and Third Country Resettlement Arrangements. Consequently, Naoero is currently operating from a position of fiscal strength.

However, the path ahead requires heightened vigilance. Most Government revenue is derived from external sources (58 per cent), leaving the nation highly vulnerable to external shocks. Ongoing global geopolitical conflicts, particularly in the Middle East, present no clear resolution and threaten to exert persistent fiscal pressure by escalating domestic inflation. This current economic period presents a rare and finite window of opportunity. Naoero must capitalize on this prosperity now to invest decisively in human capital, channel funding into highly productive infrastructure, and build a sustainable, self-reliant economy for future generations.

BUDGET AGGREGATES

An overview of the budget aggregates is shown in Table 1.1.

The total estimated revenue for 2026-27 is \$359.2 million, while the total expenditure is \$359 million, resulting in a small net fiscal surplus of \$0.2 million, equivalent to 0.1% of GDP.

TABLE 1.1: BUDGET AGGREGATES

	2024-25 Preliminary Actual	2025-26 Original Budget	2025-26 Revised YTD Budget	2025-26 Actual (Preliminary)	Percent of Budget	2026-27 Proposed Budget
Revenue	326,527,889	358,589,594	412,342,794	378,152,427	92%	359,198,418
Expenditure	363,699,099	358,552,862	412,285,213	378,082,753	92%	359,041,193
Balance (Surplus/(De)ficit)	- 37,171,209	36,732	57,581	69,673		157,225
Less Reserve Re-appropriation	37,600,000					
Net Budget Surplus/Deficit	428,791	36,732	57,581	69,673	-	157,225

Overall, the fiscal performance for FY 2025-26 was slightly better than initially projected, due to measures taken by Department of Finance Treasury to tightly manage operational costs by

applying expenditure restraints due to the revenue constraints. A full report on the 2025-26 performance is discussed in further detail in the later section of this budget report.

The government's policy priorities for FY 2026-27 include:

Continued macro-economic stability through capitalizing on the current high-revenue environment, accumulating long-term savings in the Intergenerational Trust Fund and Fund 2, and sourcing sustainable, alternative revenue streams such as the Naoero Economic and Climate Resilience Investment Program (NECRIP).

Ensuring that revenues are channelled to key development sectors and support long-term, productive infrastructure investments, including the Sustainable and Climate-Resilient Port, renewable energy transition, and the modernization of the national public transport fleet with electric vehicles.

Investment in innovative solutions to Naoero's health challenges by optimizing the Public-Private Partnership for clinical services, establishing a new Regulatory Health Department for strict oversight, and scaling up preventative care through a dedicated Public Health department.

Aggressive investment in human capital through the Education sector, focusing on structured Re-Engagement Programs and targeted incentives, while demanding strict compliance and accountability to improve academic outcomes.

Prioritised investment in activities that will broaden our economic base, specifically targeting new commercial avenues through the Command Ridge Virtual Asset Authority (CRVAA) and scaling up local agricultural production.

Investments to ensure that the upcoming 11th Micronesian Games are used as a platform for transforming lifestyles, supported by the development of world-class infrastructure such as the Menen Stadium and Aiwa Tennis Centre to promote national fitness.

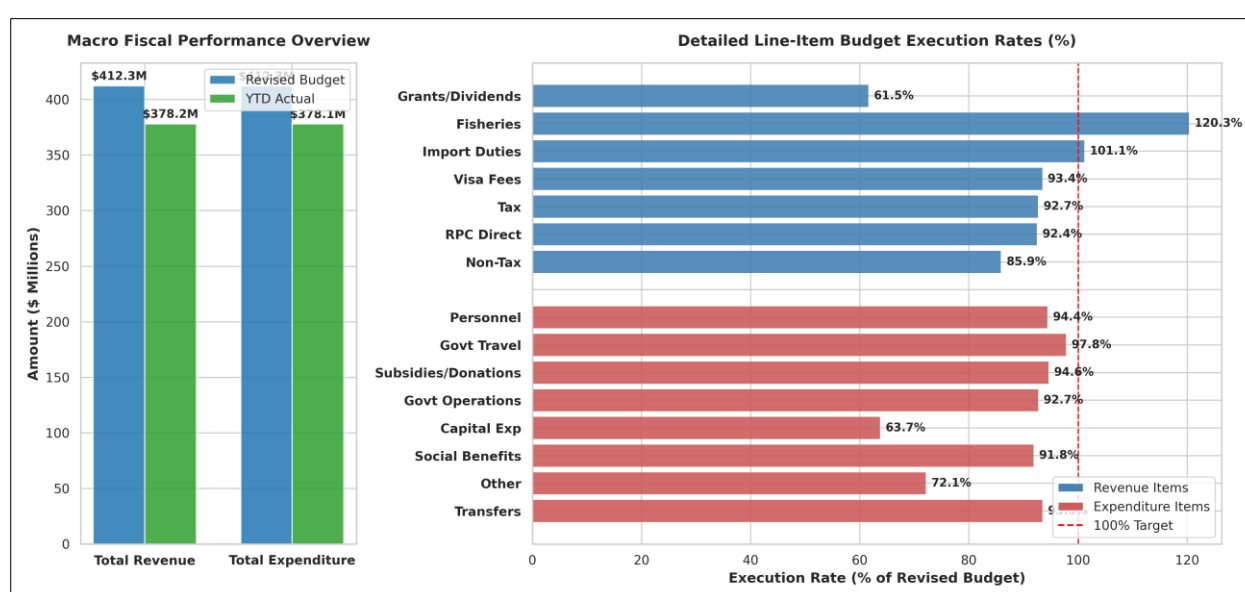

Targeted cost of living and safety net initiatives, utilizing recent Household Income and Expenditure Survey (HIES) findings and the Asian Development Bank's review to ensure fuel subsidies, revised pensions, and social protection programs are accurately targeted, sufficient, and fiscally sustainable.

Continuing to address cross-cutting issues such as improving women’s empowerment, advancing vital public financial management reforms, and enhancing climate change adaptation and mitigation.

2025-26 FISCAL PERFORMANCE

At the end of FY 2025-26, the Government recorded a net surplus of 69 thousand, equivalent to 0.025% of GDP, higher than budgeted net surplus of 58 thousand.

The chart and analysis below show a performance of various revenue and expenditure categories for the financial year 2025-26.

REVENUE PERFORMANCE HIGHLIGHTS

Overall: 91.71% Execution

Fisheries Outperformance: Fisheries was the stand-out performer, generating 120.3% of its target (\$60.8 million actual vs. \$50.5 million budget), providing a crucial fiscal buffer.

- **Import Duties:** Collections came in stronger than anticipated, exceeding revised budget estimates by \$0.2 million.
- **Grants Shortfall:** The most significant drag on overall revenue was Grants, Dividends & Other Financing, which achieved only 61.5% of its budget (\$35.7 million actual vs. \$58.0 million budget). This shortfall is primarily attributable to two factors: The delayed receipt of USD 10 million (AUD 14 million) in PRC budget support. There was a timing delay in the finalization of the support agreement, with the deposit now expected to be received in July. The non-receipt of a \$6 million dividend from Ron Phos. This revenue has been permanently

foregone due to operational disruptions during the year and the unrealized joint venture arrangement with the Nauru Rehabilitation Corporation (NRC).

- **Tax Deficit:** A \$2.0 million shortfall in tax revenue was driven by arrears in business profit taxes and telecommunication taxes from CENPAC and Neotel. Despite these entities capturing increasing mobile market share from Digicel, their tax remittances have not scaled commensurately. The Nauru Revenue Office has completed an assessment of CENPAC's tax liabilities, and a formal payment arrangement has been agreed upon to clear this balance.

- **Regional Processing Arrangement:** The Regional Processing arrangement comprising of Direct Regional Processing Centre (RPC) and Third Country Resettlement Arrangements (TCRA), executed at a stable 92.4% (\$218.9 million actual vs. \$236.8 million budget), tracking closely with overall collections. The variance is largely a result of administrative shifts.

A late change in the accounting process by the Australian Department of Home Affairs shifted the RPC payment cycle from in-advance to in-arrears. Consequently, the \$12.9 million June RPC invoice could not be collected within the financial year and will be recognized in July.

The remaining \$5.0 million variance relates to reimbursable revenue for Refugee Status Determination (RSD) and variable fees. Logistical process changes temporarily impacted collections during the year; however, these have since been rectified, and the outstanding balance is programmed for collection in the new financial year.

All funding relating to TCRA has been received during the financial year

Non-Tax: The Citizenship by Investment program accounts for 55% of the total projected non tax revenue portfolio. Against a budget estimate of \$9 million, actual receipts totalled \$3.4 million for FY 2025-26. was collected. This revenue variance was primarily driven by a highly competitive global market, unfavourable USD/AUD exchange rate volatility, and initial administrative processing delays. However, having now established a robust, compliant, and efficient processing framework, the program's structural integrity has matured, positioning it to deliver more stable yields in the upcoming financial year.

EXPENDITURE PERFORMANCE HIGHLIGHTS

Overall: 91.70% Execution

- **Operational Discipline:** Major operational costs were tightly managed to track revenue constraints, with Personnel (94.4%) and Govt Operations (92.7%) remaining strictly within their revised budget limits.
- **Capital Underspend:** Capital Expenditure lagged significantly at 63.7% execution (\$15.4 million spent against a \$24.2 million budget). This indicates that overall expenditure savings were heavily driven by delayed project rollouts rather than exclusively through operational cost reductions.

TREASURY FISCAL RESTRAINT APPROACH

Following a review of the revenue position at the beginning of Quarter 3, and accounting for the key revenue risks outlined above, Treasury issued a directive to all departments mandating expenditure restraints. These measures included:

- The early closure of purchase requisitions by the first week of June.
- Restrictions on Inter-Subhead Transfers (ISHTs):

ISHTs were prohibited from being used to reallocate funds *into* non-essential or discretionary budget lines, specifically:

Travel expenses (2070 - Travel Staff, 2075 – Travel Business)

- Consumables (2100 - Entertainment, 2130 – Printing and Stationery, 2135 - Stores)
- Repairs and maintenance (2185 – R&M Building)
- Plant and equipment (2495 – Plant and Equipment Purchases)
- Conversely, ISHTs were prohibited from reallocating funds *out of* core protected lines, including:
 - Salary and allowance expenses (2015 – Salary Local, 2020 – Salary Expatriate, 2025 - Allowances Staff Contract, 2031 – Staff Contract Ministerial)
 - Any ring-fenced funding approved for New Project Proposals (NPPs).

ECONOMIC OUTLOOK

The Treasury uses the IMF World Economic Outlook to inform its forecasts of economic activity. Economic activity has been slowing between 2021 and 2024. It is expected to pick up again during 2024 and 2025 as the expansion of operations at the RPC filters through to the wider economy.

TABLE 1.2: KEY ECONOMIC INDICATORS

Indicator	2023-24	2024-25	2025-26	2026-27
Real GDP (per cent change)	1.4	2.2	2.1	2
Nominal GDP (A\$ million)	247.6	266.1	282.5	296.9
Consumer Prices Index (period average, per-cent change)	9.3	6.1	5.5	4.2

Source: IMF WEO April 2026, IMF Article IV Naoero 2025

GLOBAL PROSPECTS

The global outlook has become more uncertain following the outbreak of conflict in the Middle East in early 2026.

Under the IMF's reference forecast, global growth is projected at 3.1 percent in 2026 and 3.2 percent in 2027, while global inflation is expected to rise to 4.4 percent in 2026 before easing to 3.7 percent in 2027. The main risks are higher energy and commodity prices, disrupted supply chains, tighter financial conditions, and increased market volatility.

The IMF warns that the economic fallout from these crosscurrents varies glaringly across different countries. While economies plugged into the technology-led upturn are experiencing robust activity, the war shock is heavily weighing on energy-importing nations and vulnerable economies that remain outside the global technology value chain.

Risks to the global outlook remain decisively tilted to the downside. The primary threats include prolonged disruptions and renewed escalations in the Middle East, persistent energy and commodity price volatility, accelerating trade fragmentation, and the potential for a sharp correction in technology-related market expectations.

For Naoero, navigating this environment requires strict vigilance. As a vulnerable, energy-importing nation, we remain directly exposed to the inflationary shocks of high global fuel and commodity prices. While global uncertainties persist, our current fiscal strength,

bolstered by new sovereign revenues and major domestic infrastructure milestones, provides the critical buffer necessary to weather this volatility and sustain positive domestic growth.

The IMF noted in its latest Article IV consultation that the Government of Naoero has made significant strides in restoring economic stability despite inherent structural challenges. The Fund welcomed our commitment to fiscal prudence, positive budget balances, and sustained contributions to the Intergenerational Trust Fund. However, long-term prosperity depends on continuing to diversify the economy and overcoming climate-related vulnerabilities. Sustained growth will require supportive policies to aggressively invest in human capital and productive infrastructure as the nation prepares to graduate to a high-income country in January 2027.

Our current high-revenue environment is expected to have a positive effect on Gross Domestic Product (GDP). While official figures may take time to reflect this, there are strong indications that economic growth will accelerate across 2025–26 and 2026–27 as new expenditure policies and major capital investments take full effect.

FISCAL STRATEGY AND OUTLOOK

This section is consistent with the national Economic Goals 1 and that is to maintain a stable macroeconomic environment that is conducive to private sector investment. The overarching goals of this strategy are economic stability and optimum allocation of resources to accelerate our economic diversification and boost investment.

MEDIUM TERM FISCAL STRATEGY

The Medium-Term Fiscal Framework provides a forward-looking assessment of the Government's fiscal sustainability and balance sheet position over the period 2024–25 to 2032–33. The framework supports fiscal decision-making by linking annual budgets to medium-term economic and fiscal objectives while assessing the sustainability of current policy settings under a range of fiscal and economic conditions. Consistent with international good practice, the MTFF focuses not only on annual fiscal balances but also on the strength of the Government's balance sheet, including liquidity buffers, financial assets, public debt and net financial worth.

Table 1: MTFF- Fiscal Summary

Indicator (% of GDP)	Actual	Budget	Medium Term			Long run		
A\$M	2025-26	2026-27	2027-28	2028-29	2029-30	2030-31	2031-32	2032-33
Revenue	148.2	122.9	122.0	119.5	117.2	114.9	112.8	110.8
Expenditure	148.2	122.8	120.4	119.3	116.3	113.9	111.6	109.4
Fiscal balance	0.0	0.1	1.6	0.2	0.9	1.0	1.2	1.4
NTF balance	145.6	155.4	195.8	206.0	215.9	225.5	234.9	244.1
Debt	2.3	1.6	1.0	3.9	3.1	2.4	1.8	1.2
Net worth	196.9	204.9	246.6	251.8	261.1	270.3	279.3	288.4

The projections indicate that Naoero is expected to maintain a sustainable fiscal position throughout the forecast horizon. Revenue is projected to remain exceptionally strong, declining gradually from 148.2 per cent of GDP in 2025–26 to 110.8 per cent of GDP by 2032–33 as some externally sourced revenue streams moderate over time. Despite this decline, revenue remains at historically high levels and continues to support government operations, strategic investments and long-term fiscal sustainability. At the same time, expenditure is

projected to decline from 148.2 per cent of GDP in 2025–26 to 109.4 per cent of GDP by 2032–33, reflecting continued expenditure discipline and prudent fiscal management.

Fiscal balances are projected to remain positive throughout the medium and longer term, averaging around 1 per cent of GDP and peaking at 1.6 per cent of GDP in 2027–28. These surpluses support the continued accumulation of financial assets and provide flexibility to respond to future economic risks and opportunities while maintaining fiscal sustainability.

A key strength of the fiscal outlook is the maintenance of substantial liquidity buffers. Excess cash balances remain above 29 per cent of GDP throughout the projection period, providing an important safeguard against revenue volatility, natural disasters and other unforeseen fiscal shocks. These reserves remain comfortably above the Government's fiscal buffer requirements and continue to underpin fiscal resilience.

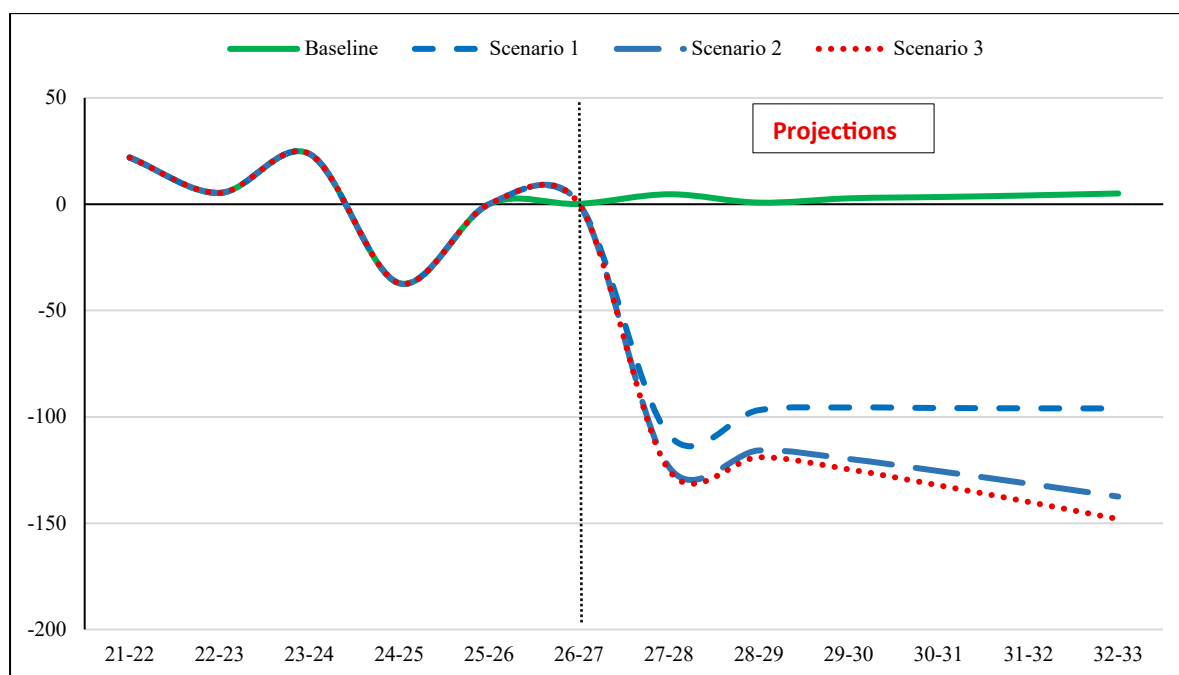

The MTFF assumes that contributions to the Naoero Intergenerational Trust Fund (NTF) will continue over the forecast period in accordance with existing funding arrangements and Government policy. As a result, NTF assets are projected to increase from 145.0 per cent of GDP in 2024–25 to 244.1 per cent of GDP by 2032–33. The continued growth of the Fund significantly strengthens Naoero's balance sheet and provides an important source of long-term fiscal security.

Together, strong cash balances, growing Trust Fund assets and very low public debt contribute to a substantial improvement in net financial worth, which is projected to increase from 189.3 per cent of GDP in 2024–25 to 288.4 per cent of GDP by 2032–33. This reflects the Government's strategy of building national wealth, preserving financial assets for future generations and strengthening long-term fiscal sustainability.

FISCAL RISKS AND SCENARIO ANALYSIS

While the baseline outlook remains favourable, Naoero's fiscal position continues to be influenced by developments in migration-related revenues, development partner support, investment returns and the success of ongoing economic reforms. Alternative scenarios have been developed to assess the resilience of the fiscal outlook under different assumptions and to illustrate the potential impact of policy choices and external developments on medium-term fiscal sustainability.

Figure 1: Comparison of Fiscal Balance under each Scenario

Summary of the various scenarios:

The **Baseline Scenario** assumes that strengthened RPC and related migration arrangements continue over the medium term, supported by growing development partner assistance, future revenues from the Citizenship Investment Programme (CIP), future income streams from the Naoero Intergenerational Trust Fund (NTF) and productivity-enhancing reforms. Under this scenario, fiscal surpluses are maintained, financial assets continue to grow, and the Government's balance sheet strengthens steadily over the projection period.

The **Medium-Term Diversification** (Scenario 1) – assumes RPC and related activities gradually taper over time, although the adjustment is partially offset by stronger development partner support and a more favourable revenue outlook than the consolidation scenario. Fiscal outcomes remain stronger than under a purely domestic reform pathway but remain below the baseline, highlighting the benefits of external partnerships while reinforcing the need for broader revenue diversification.

The **Short-Term Consolidation** (Scenario 2) assumes that RPC and related activities gradually decline over time. Fiscal resilience is supported through stronger tax compliance, improved revenue administration, expenditure discipline and modest growth in budget support. While these measures improve fiscal outcomes, the scenario demonstrates that domestic reforms

alone are unlikely to fully replace the revenues generated through migration-related activities, reinforcing the need for continued economic diversification.

The **Downside Scenario** (Scenario 3) assumes a more rapid decline in RPC and related migration revenues, with no significant new revenue streams emerging to offset the loss. Fiscal pressures increase progressively over time, and financial buffers are drawn down more rapidly. While the Government's strong balance sheet provides protection in the near term, the scenario highlights the risks associated with a narrow revenue base and emphasises the importance of maintaining strong fiscal buffers and long-term savings.

MEDIUM-TERM OUTLOOK AND FISCAL SUSTAINABILITY

The scenario analysis demonstrates that, despite the improved outlook, Naoero's fiscal position remains sensitive to the future trajectory of migration-related revenues. The baseline scenario illustrates how strengthened migration arrangements, revenue diversification initiatives and continued reform can support a sustainable fiscal path. By contrast, all alternative scenarios exhibit varying degrees of fiscal adjustment as RPC-related revenues taper over time, highlighting the importance of developing alternative revenue sources and maintaining prudent fiscal management.

A key strength of the outlook is the continued accumulation of financial assets through the NTF, alongside substantial cash reserves and exceptionally low public debt. These factors strengthen fiscal resilience, reduce vulnerability to future revenue shocks and support intergenerational equity.

Overall, the MTF demonstrates that Naoero is well positioned to convert current revenue opportunities into lasting national wealth. Maintaining fiscal discipline, growing long-term savings and continuing efforts to diversify the economy will be critical to supporting long-term fiscal sustainability, economic resilience and future prosperity.

FISCAL RESPONSIBILITY RATIOS

To ensure long-term macroeconomic stability and preserve structural fiscal space, the Government has adopted three core fiscal responsibility ratios. These indicators anchor budget formulation and execution over a rolling three-year medium-term timeframe:

Budget Balance: Must be positive as a share of Gross Domestic Product (GDP)—ensuring the central government budget remains in surplus over the medium term.

Personnel Costs: Total personnel expenditure must be maintained below 30% of total current expenditure over the same period.

Fiscal Cash Buffer: Maintenance of an operational cash reserve equivalent to a minimum of two months of adjusted non-Regional Processing Centre (RPC) expenditure.

The Government successfully conformed to all three fiscal benchmarks during the FY 2024–25 and FY 2025–26 fiscal intervals. This compliance underpins Naoero’s transition into the new medium-term planning cycle commencing in FY 2026–27.

TABLE 1.3: FISCAL RESPONSIBILITY RATIOS

Target	2023-24 Actual	Prelimi nary Actual	Prelimi nary Actual	Rolling three year average	2026-27 Approved Budget
Not negative as % of GDP over 3-year rolling period	15.5%	-14.0%	0.0%	0.2%	0.1%
Personnel Costs to current expenditure <30%	17.0%	16.7%	16.2%	16.6%	19.2%

Fiscal Balance to GDP

As indicated in Table 1.3 above, the benchmark ratio for the fiscal balance has been consistently met, averaging a balanced-to-positive position relative to GDP over the three-year period ending in FY 2025–26. This track record reflects rigorous expenditure discipline and volatile revenue management. With the commencement of the new three-year rolling fiscal framework in FY 2026–27, the Government will maintain this conservative posture to guard against sudden external revenue shocks.

Personnel Cost Ratio

Personnel expenditure as a proportion of current operations remains comfortably below the 30% statutory threshold. Managing this ratio aligns with international recommendations to prevent demand-pull inflationary pressures within the domestic economy. Over the medium

term, Treasury will continue to monitor establishment ceilings to ensure that public sector wage growth matches domestic productivity trends.

TABLE 1.4: FISCAL CASH BUFFER REQUIREMENTS

	TOTAL FUNDS (\$)		
	Requirement (\$)	As at 1 July 2025	As at 30 June 2026
Cash Buffer at 1 July 2025	42,340,655	148,861,107	
Cash Buffer at 30 June 2026	45,037,674		148,744,500
<i>of which held in cash buffer accounts</i>		36,562,784	35,845,703

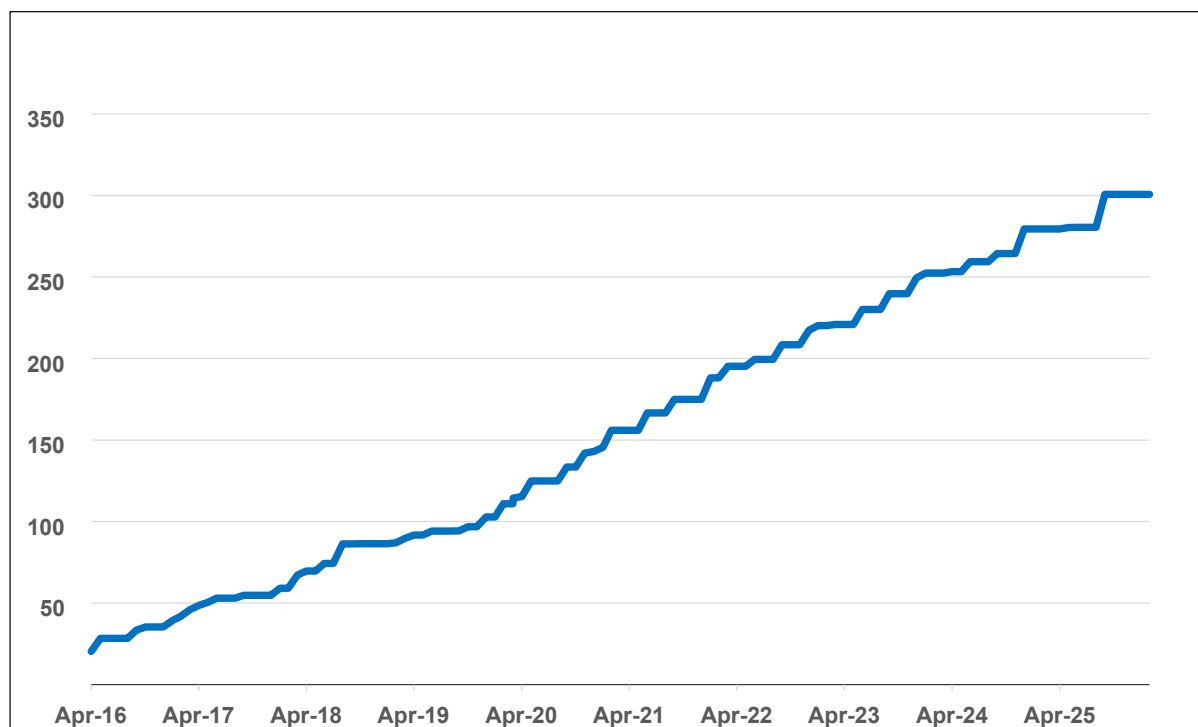

The fiscal cash buffer is a cash management arrangement targeted at building up cash to mitigate liquidity risks. The overall strategy is to continue to build up the cash buffers to the equivalent of a minimum of two months' adjusted expenditure, so that the government has sufficient cash on hand to meet its bills in a timely manner.

NAOERO INTERGENERATIONAL TRUST FUND (NTF)

FUND #1

The level of government contributions to the Naoero Intergenerational Trust Fund (NTF) is set each budget consistent with the Memorandum of Understanding (MOU) with Australia, Taiwan, Province of China and New Zealand, that underpins the Fund's operations. It is updated in August each year following confirmation of actual revenue receipts. During the financial year 2024-25, Taiwan, Province of China, made the decision to be removed from the requirements of the MOU and will exit the arrangement during at a date to be agreed by all members. It is expected that Taiwan, Province of China will seek the return of all moneys and accumulated earnings deposited by them since the fund's inception. The estimated value of this withdrawal is \$43+ million Based on the Fund value at the time.

CHART 1.1: CUMULATIVE CONTRIBUTIONS TO THE NAOERO INTERGENERATIONAL TRUST FUND

The government plans to maintain its required contribution to the NTF at 10.1% of adjusted prior year revenue in FY 2026-27.

For the FY 2026-27 budget, the government's contribution is forecasted at \$24.3 million. A prepayment of \$2 million was made towards this obligation in 2026-27, leaving the remaining balance of \$22.3m to be appropriated in 2026-27.

Total cash contributions on 31 March 2026 were over \$300 million. Contributions since establishment to March 2024 are shown in the chart below.

The NTF continues to grow with continued annual support contributions from fund stakeholders, namely Australia, Taiwan, Province of China, New Zealand. The Asian Development Bank (ADB) was instrumental in establishing the fund and made an initial contribution. The fund is achieving its investment objectives and well on the way to the goal of \$1 billion+ by 2034. The Fund follows compliance with national development priorities.

Total contributions to date, and the composition of contributors to the NTF is shown in Table 1.5 below.

TABLE 1.5: NAOERO TRUST FUND CONTRIBUTIONS

Summary of cash contributions received						
	ADB	Australia	Naoero	NZ	Taiwan	Total
To Jun-17	2,634	9,928	32,335	-	8,056	52,954
To Jun-18	2,634	12,067	47,132	1,855	10,635	74,323
To Jun-19	2,634	13,567	61,765	2,796	13,438	94,199
To Jun-20	2,634	16,428	85,686	3,724	16,444	124,917
To Jun-21	2,634	19,928	119,404	5,589	19,053	166,608

FUND #2

In late 2025 there was a new agreement entered into by Government of Naoero and Australian Department of Home Affairs (AHA - TCRA). This agreement is to host a cohort of

TCRA individuals with 30-year visas to reside in Naoero. There is a separate MOU governing the operation and funding.

The funding includes ongoing annual support for direct costs along with the establishment of an additional Trust Fund (#2). The committee members are one from Naoero and one from AHA and its operations are separate and distinct from Fund #1.

Like Fund #1, the administrator is BDO and Mercer International the fund managers. Access and full ownership of the Fund is per the MOU.

ALIGNING THE BUDGET TO THE NATIONAL DEVELOPMENT PRIORITIES

In formulating the expenditure and revenue measures of the FY 2026–27 Budget, the Government ensures that the National Sustainable Development Strategy (NSDS) 2019–2030 serves as the primary driving force. The NSDS outlines 24 strategic goals, mapped to 132 specific Key Performance Indicators (KPIs), which government departments and State-Owned Enterprises (SOEs) must directly reference when designing their budgets, Annual Operational Plans (AOPs), and Statements of Corporate Intent (SCIs).

To reinforce fiscal accountability, the Government continues to strengthen the mid-year fiscal review process executed by Cabinet. Departments, SOEs, and Government Corporate Entities (GCEs) are held strictly accountable to their baseline targets, ensuring that public resources are channelled into high-impact, results-oriented national priorities.

A comprehensive, goal-by-goal progress analysis is detailed separately under Budget Paper 2, which readers should refer to for an in-depth review.

Key funded measures in this budget supporting the NSDS core pillars include:

- ***Social Sector & Well-being:*** The government is driving systemic healthcare delivery through the \$26.0 million clinical services partnership with GMSS, backstopped by \$4.2 million for the newly established Regulatory Health Department to enforce national standards. Human capital development is sustained through a \$20.5 million total investment in education, prioritizing targeted youth re-engagement and local workforce upskilling through the VTPD.
- ***Infrastructure & Economic Services:*** National asset building is actively funded through direct allocations, including \$4.3 million for transferee housing under the TCRA, \$1.1 million to finish the construction of the new government building for the Presidency, Cabinet, and Finance.
- ***Energy Security & Climate Resilience:*** To build structural economic resilience against external shocks, this budget provides a \$2.2 million interest-free loan to the Naoero Utilities Corporation (NUC) for critical generator replacements, paired with a \$3.5 million fuel subsidy allocation to protect local consumers from volatile global import prices.

- **Good Governance & Accountability:** Institutional transparency is reinforced by funding critical administrative upgrades, including the rollout of the final HRP modules under the Chief Secretary’s Department, alongside dedicated funding to host regional transparency forums like the PASAI Congress and the PFICP plenary.

DONOR COMMITMENTS

Naoero’s development partners have pledged a total of **\$123.9 million** in development support for FY 2026–2027. This comprehensive package is split between **\$28.5 million** in direct cash budget support to fortify fiscal stabilization and **\$95.4 million** in specialized project and in-kind assistance.

A high-level summary of partner contributions for the financial year includes:

Government of Australia: Pledged \$35.0 million, comprising \$20.0 million in direct budget support via the Naoero-Australia Treaty alongside \$15.0 million in targeted sectoral assistance.

People's Republic of China: Committed \$24.1 million in Aid in-kind project delivery to support national infrastructure projects.

Government of Japan: Pledged \$22.6 million focused on key national security, telecommunications, and cultural development activities.

Asian Development Bank (ADB): Pledged \$28.1 million, structured as \$7.0 million in direct budget support under the Improving Fiscal Sustainability Program, paired with \$21.0 million for primary urban and utility infrastructure works.

Government of New Zealand: Committed \$9.7 million, distributing \$1.5 million to improved financial governance alongside \$8.2 million for Naoero’s trust fund, along with support to education, parliamentary governance, aviation security equipment and regional activities.

United Nations (UN): Providing \$4.4 million in multilateral assistance directed toward core social development, environmental initiatives, and institutional governance support.

A detailed breakdown of specific projects, performance metrics, and individual sector allocations is available within the standalone Development Fund Projection Report, which readers can refer to for more specific analysis.

PUBLIC DEBT STRATEGY

This section sets out the Government of Naoero's Public Debt Strategy for the next three fiscal years, integrated directly within the FY 2026–27 Budget Papers to satisfy the statutory requirements of the *Public Debt Act 2026*. Incorporating this strategy within the core budget framework aligns debt management with broader national fiscal policy, long-term sustainability objectives, and the active preservation of fiscal space. The Government remains firmly focused on prudently managing its debt liabilities amidst broader global macroeconomic uncertainties, climate change risks, and structural economic adjustments.

Objectives and Scope of the Public Debt Strategy

The objective and scope of the Public Debt Strategy is to manage public debt in a manner that ensures Government financing needs and payment obligations are met at the lowest possible cost over the medium to long term and to ensure that risks in the public debt portfolio remain at acceptable levels.

As required by the Public Debt Act 2026:

- The Secretary shall establish an annual Public Debt Strategy covering the current and the 2 next financial years consecutively.
- The Public Debt Strategy shall be submitted to the Cabinet for approval.
- The Minister shall table the Public Debt Strategy in Parliament, after it is approved by the Cabinet.

The Strategy shall prescribe:

- guidelines and specified targets for the composition of the Government's debt portfolio;
- guidelines and specified targets for new debt issuance as set out in the annual borrowing plan;
- policies and guidelines for lending, on lending, and the provision of loan guarantees; and
- any additional matters prescribed in the Financial Instruction: Liabilities.

Existing Naoero Public Debt Portfolio

Naoero's public debt portfolio as at 30 June 2026 comprises one external loan from EXIM Bank (Taiwan) for RONPHOS (refer to Box 1 below) and the Bank of Naoero outstanding creditors. The external loan from EXIM Bank (Taiwan) for the National Airline Corporation (NAC) was fully prepaid on 17 May 2026. As a result, Naoero's external public debt has fallen to below 1% of GDP.

The following four tables set out (1) total government external debt outstanding; (2) total government liabilities; (3) total government debt service; and (4) net debt, all as at 30 June 2026. The exchange rate used to convert the RONPHOS loan to Australian dollars for 2025-26 onwards is 0.7113 per US dollar (the exchange rate as at 30 April 2026).

Box 1: RONPHOS External Debt

The Republic of Naoero acting by and through its Department of Finance (the “Borrower”) signed a loan agreement on 16 October 2018 with the Export-Import Bank (EXIM) of the Republic of China (Taiwan). The US\$5 million aggregate principal amount has been used to support the Republic of Naoero Phosphate Corporation (RONPHOS) in its purchase of mining equipment for extraction of secondary phosphate. While the loan is for RONPHOS, with a subsidiary loan agreement between the Republic of Naoero and RONPHOS dated 14 November 2018, the primary loan is in the name of Republic of Naoero and therefore is classified as central government public debt and recorded in the public debt register (in accordance with the international debt classifications). The primary loan between Republic

of Naoero and EXIM Bank Taiwan is backed by a subsidiary loan between Republic of Naoero and RONPHOS on the same terms and conditions. Currently, RONPHOS is servicing the obligations under the loan agreement directly with EXIM (Taiwan).

The structure of the Naoero Public Debt portfolio as at 30 June 2026

BANK OF NAOERO CREDITORS

Creation of Creditors' Trust

The Treasury has calculated that the balance due to Bank of Naoero creditors as at January 2026 was A\$4,298,733.61. This has been incorporated into the Naoero Public Debt Portfolio as domestic debt and with repayments of A\$1 million for each of the next four fiscal years with the balance payable in fiscal year 2030-31.

A Creditors' Trust has been established as a mechanism to be used to accelerate an entity's exit from liquidation. Upon establishment of the Creditors Trust, any admitted creditors' claims against the Bank of Naoero will be extinguished and transferred to the Creditors' Trust. Admitted creditors will then become beneficiaries of the Creditors' Trust.

The class of claimants who will become beneficiaries of the creditors' trust are:

Admitted claimants whose residual balance exceeds the funds available to discharge their claim in full by 19 December 2025 (the smaller claims might be discharged as part of the batch 2 or proposed batch 3 distribution to obviate the need to for such claimants to be included as a beneficiary of the creditors' trust e.g. claimants owed less than \$20,000); and

Admitted claimants who have lodged a valid claim in respect of a deceased estate who fail to lodge by 19 December 2025 a statutory declaration identifying estate beneficiaries and bank account nomination forms.

DEBT PORTFOLIO ANALYSIS

The following provides a brief overview and analysis of the public debt portfolio as at the end of the current fiscal year, 30 June 2026.

As the remaining EXIM bank loan (RONPHOS) is denominated in US dollars, it presents foreign exchange (FX) risk to an adverse movement of the Australian dollar. The loan also has a floating interest rate (indexed to the SOFR rate), which presents interest rate risk. Bank of Naoero creditors are all denominated in Australian dollars and classified as domestic debt. No interest is being paid on the funds to be paid to creditors.

The risk indicators for the public debt portfolio, separated into external and domestic debt are set out in the following table:

Risk Indicators (for year ending 30 June 2026)		External Debt	Domestic Debt	Total Debt
Total Debt (in million AUD)		2.184	4.299	6.482
Total Debt (in million USD)		1.500	2.953	4.453
Nominal Debt as % of GDP		0.8%	1.5%	2.3%
PV of Debt as % of GDP		0.8%	1.4%	2.2%
Interest Payment as % of Government Revenue		0.03%	0.00%	0.03%
Cost of Debt	Interest Payment as % GDP	0.04%	0.00%	0.04%
	Weighted Average Interest Rate (%)	5.34%	0.00%	1.38%
Refinancing Risk	Average Time to Maturity (ATM) in years	1.30	2.04	1.85
	Debt Maturing within 1-year (% total debt)	33.3%	23.3%	26.7%
Interest Rate Risk	Average Time to Refixing (ATR) in years	0.04	2.04	1.53
	Debt Refixing within 1-year (% total debt)	42.13%	57.87%	100.00%
	Fixed Rate Debt (% of total debt)	0.00%	66.31%	66.31%
FX Risk	Foreign Currency Debt (% total debt)			33.69%

The cost and risk analysis shows:

- Nominal Debt as percent of GDP is 0.7% for external debt, 1.5% for domestic debt, and 2.3% for total public debt. This is very low and clearly indicates that Naoero would be classified with a very low risk of debt default.
- Interest payments as a percent of Government Revenue is only 0.03%, which presents only a very minimal cost to the Government.
- While the weighted average interest rate for external debt is 5.34% (6-month SOFR plus 1.7%), the weighted average for the total debt portfolio is 1.38% due to zero interest payable to the Bank of Naoero creditors. This is clearly below the current market interest rate.
- The weighted average time to maturity of 1.85 years and 26.6% debt maturing within 1-year signals a high level of refinancing risk. However, the small amount of public debt outstanding indicates that this will not be a problem as payments due can be easily met from RONPHOS and Government revenue.
- While the external loan is floating rate linked to 6-month SOFR, the loan repayments are being met by RONPHOS. If short-term US dollar interest rates were to rise significantly, this will increase the interest cost to RONPHOS. To some extent, this is mitigated by the small principal amount outstanding under the loan and that there are six remaining instalments to be made, the last being on 16 January 2029.
- As only 32.9% of the public debt portfolio is denominated in US dollars, the FX risk is lower than when Naoero had the loan with Naoero Airlines. As RONPHOS bears the FX risk, it could consider whether to hedge some or all the remaining principal payments through forward FX transactions.
- As shown in Table 4 above, the net debt position of Naoero is estimated to be around A\$903.9 million as at 30 June 2026 representing around 321% of GDP. This demonstrates a very healthy net asset position for the Government.

PUBLIC DEBT STRATEGY FOR PERIOD 2026-27 TO 2028-2029

The public debt strategy for the next three fiscal years involves no borrowing by the Government of Naoero as expenditure will be met from revenue. The only borrowing will be undertaken by Public Enterprises either directly with or without a government loan guarantee

or through an on lending from the Government. Any borrowing is expected to be from the Asian Development Bank (ADB) under a USD 45.07 million Concessional Loan (COL) facility.

If any Public Enterprise looks for a loan(s) from other multilateral development banks or bilateral lending agencies, any borrowing should be on concessional terms with at least a 35% grant element.

Composition of the Government's Public Debt Portfolio

The composition of the Government's public debt portfolio will not change from that shown in Table 1 and Table 2 above, unless new borrowing is undertaken by a Public Enterprise.

Annual Borrowing Plan for 2026-27

The borrowing plan for 2026-27 does not include any new loans. The only borrowing that is currently being examined is from the total ADB COL facility available to Naoero. As at the time for formulating this strategy, the only ADB loan nearing finalization is a USD 15 million for Naoero Airlines for the purchase of a new 800-series passenger aircraft. If this proceeds, it will be a direct borrowing by Naoero Airlines and therefore classified as General Government debt (i.e. included under Public Debt) rather than Central Government debt.

While there may be other loan proposals under consideration by Public Enterprises, these may not proceed as they will be subject to significant scrutiny as required under the Public Debt Act 2026 and the Financial Instruction Liabilities. If any are loans are completed, the financial implications of any decisions will be incorporated into the next public debt strategy.

Lending, On lending, and the Provision of Loan Guarantees

The Government does not plan to provide any lending, on-lending or loan guarantees to Public Enterprises during fiscal year 2026-27. If any are requested, these will be subject to the requirements set out in the Public Debt Act 2026 and the Financial Instruction Liabilities. Any decisions will be incorporated into the next public debt strategy.

PUBLIC FINANCIAL MANAGEMENT REFORM INITIATIVES

The Government's public financial management agenda is driven by the formal 2023–2027 PFM Roadmap, developed in collaboration with the International Monetary Fund (IMF) through the Pacific Financial Technical Assistance Centre (PFTAC). Given the fiscal strength characterizing the 2026–2027 Budget, the reform focus has transitioned from basic stabilization toward institutional modernization, long-term fiscal resilience, and stringent internal control.

Addressing Gaps and Structural Challenges

While notable structural progress has been achieved, the Government explicitly acknowledges that substantial gaps and systemic weaknesses remain across the national PFM framework. These deficiencies are clearly reflected in the poor baseline ratings received during the 2022 Public Expenditure and Financial Accountability (PEFA) assessment—particularly across critical pillars such as public procurement transparency, payroll controls, project appraisal, and the financial reporting backlog.

Addressing these vulnerabilities requires intensive, sustained effort ahead of the next independent PEFA assessment. Progress on these fronts has historically been constrained by deep-seated institutional challenges, primarily low technical capacity within line ministries and a historical lack of political will to enforce rigid compliance across the public sector. This budget marks a deliberate shift toward providing both the political backing and the administrative enforcement necessary to drive real compliance.

Core Reform Streams for FY 2026–27

1. Medium-Term Fiscal Framework (MTFF)

The Government has successfully shifted to a multi-year fiscal planning model, directly addressing Phase 2 objectives of the PFM Roadmap. The Medium-Term Fiscal Framework (MTFF) has been formally expanded to a three-year rolling projection horizon for the current budget cycle. To institutionalize this technical capacity, a dedicated Chief Economic Officer has been recruited to drive evidence-based fiscal analysis. Furthermore, the Department of Finance is actively expanding its fiscal rule policy framework to ensure the domestic economy remains buffered against future external shocks.

2. Modernizing Debt and Liability Management To safeguard the Republic's strong net asset position and aggressively manage risks within the debt portfolio, the new *Public Debt Act 2026* was enacted in March 2026. This modernizes the legal framework governing borrowing, transparency, and sovereign guarantees. The Government is operationalizing the Act this month through a new *Finance Instruction: Liabilities*, which eliminates offline spreadsheet tracking by bringing various financial liabilities directly into the FMIS general ledger. The updated Public Debt Strategy for 2026–27 to 2028–29 strictly reinforces these statutory borrowing allocations.

3. Internal Audit and Expenditure Control

A major structural reform under the current roadmap is the establishment of an in-house Internal Audit function within the Department of Finance, moving away from previous outsourced arrangements. The recruitment of an expatriate Director of Internal Audit is currently underway, with the unit mandated to target high-risk areas and high-value financial transactions. Concurrently, the Financial Management Information System (FMIS) footprint continues to expand. Foreign Mission requisitions are now subject to automated, ex-ante fund controls within the FMIS, and technical efforts are actively exploring how to subject payroll postings to similar automated budget constraints.

4. Revenue Administration & Customs Modernization

To modernize collections, enhance compliance, and maximize revenue mobilization, the Government has completed the implementation of the ASYCUDA World system. This platform automates the processing and management of cargo manifests, directly underpinning customs-related revenue charging. Efforts are now underway to align ASYCUDA directly to FMIS receipting points for real-time synchronization. Additionally, Treasury is planning the deployment of surcharge-free EFTPOS terminals across all major revenue-collecting agencies to streamline public payment collections.

5. SOE Governance and Performance Oversight

Aligning with the PFM Roadmap's objective of mitigating fiscal risks and promoting corporate accountability, the Public Enterprise Monitoring Unit (PEMU) is driving commercialization across the state-owned enterprise (SOE) sector. The Government is progressively withdrawing Community Service Obligations (CSOs) where possible. SOEs are now challenged

to adapt to a self-sustaining financial environment, operate profitably, and generate reliable dividends for the Treasury, significantly reducing their reliance on direct budget subsidies. To enforce transparency, PEMU has operationalized a quarterly "traffic-light" (RAG) reporting framework tracking the financial health and budget variances of all 11 SOEs.

6. Gender-Responsive Budgeting (GRB)

To ensure national budget allocations more equitably address targeted social priorities and support vulnerable populations, an ongoing ADB-funded pilot project is underway. This initiative implements formal Gender-Responsive Budgeting (GRB) structures across five key front-line departments: Health, Police, Judiciary, Justice, and the Women's Affairs and Social Development Agency (WASDA).

CENTRAL GOVERNMENT FISCAL RISK PROFILE

Overview of Central Government Risks

Naoero has made significant strides in restoring economic stability, supported by sustained development partnerships and the revitalization of the Regional Processing Centre (RPC). However, the central government's macroeconomic landscape remains inherently fragile. The economy is heavily concentrated, with government spending substantially exceeding Gross Domestic Product (GDP) and public sector entities providing 95% of total employment. This profound lack of economic diversification leaves the central budget exceptionally exposed to exogenous shocks, shifting donor policies, and global market volatility. The current influx of high revenues presents a rare opportunity to build fiscal resilience, but it simultaneously masks underlying vulnerabilities that could trigger severe liquidity crises if external conditions deteriorate.

2. Central Government Fiscal Risk Profile

Risk Area	Profile	Stress Scenario / Impact
Regional Processing Centre (RPC) & Bilateral Arrangements	RPC hosting fees and related operations constitute the overwhelming majority of government revenue, currently estimated at up to 68% of total income. Recent transition to a tiered funding approach and ongoing negotiations regarding the Third-Party Resettlement Programme (TPRS) provide short-term stability.	Any shift in Australian border policy or unexpected scale-down of RPC operations would instantly collapse the primary revenue base. Naoero possesses only a small safety net to cushion this impact, risking a severe contraction in economic growth, mass public sector layoffs, and an inability to fund core government services.
Donor Support & OECD Graduation	Foreign grants and development aid from key partners are heavily relied upon to fund critical capital projects and budget support. Naoero's scheduled	A sharp withdrawal or reduction in concessional donor support will strain public finances and worsen the current account deficit. To bridge the funding gap, the

	graduation to high-income status under the OECD Development Assistance Committee (DAC) in 2026 threatens its eligibility for Official Development Assistance (ODA).	government may be forced to abandon critical infrastructure upgrades or resort to costlier, shorter-maturity commercial borrowing.
Government Behaviour & Pro-cyclical Spending	The high-revenue environment has fostered a rapid expansion in current expenditures, most notably an expanding government wage bill. Fiscal policy has traditionally been highly pro-cyclical, with revenue windfalls largely absorbed by immediate spending rather than saved.	Pro-cyclical spending exacerbates domestic inflation and prevents the accumulation of adequate fiscal buffers. If revenues experience a sudden shortfall, the rigid, high cost-base of the expanded public sector will trigger an immediate liquidity crisis, crowding out essential social investments.
Deep-Sea Mining (First Mover Exposure)	Naoero acts as the sponsoring state for deep-sea exploration in the Clarion-Clipperton Zone through Naoero Ocean Resources Inc (NORI). While potential future royalties offer significant upside, the regulatory framework via the International Seabed Authority (ISA) remains incomplete and heavily contested by environmental groups.	As a first-mover in this space, Naoero faces acute legal, reputational, and contingent liability risks. If the operating corporate entity faces bankruptcy, legal injunctions, or operational failure, massive financial and environmental liabilities could fall entirely on the Naoero government as the sponsoring state.
Geopolitical Risks & Global	Due to its remote location and lack of arable land, Naoero is entirely dependent on imports	Unresolved geopolitical conflicts, such as ongoing Middle East wars, threaten to spike global oil prices

Commodity Prices	for basic food, supplies, and diesel fuel. Inflation is highly sensitive to supply-side disruptions and international export prices.	and shipping costs. A protracted surge in prices will drastically erode the fiscal space, as the government will be forced to deploy heavy, unplanned subsidies to shield the population from the exorbitant cost of domestic living.
State-Owned Enterprises (SOEs)	SOEs dominate the economy but frequently operate at a loss, relying heavily on explicit and implicit government subsidies. <i>Note: Detailed SOE risk analysis is provided separately in Budget Paper 2 (BP2).</i>	Continued underperformance or capital failures in the SOE portfolio represent a massive contingent liability, requiring emergency treasury bailouts that divert funds away from central government priorities.

3. Structural Over-Reliance on Hosting Arrangements The fiscal framework is heavily skewed by its dependence on the RPC. As highlighted in historical budget documentation, the significance of RPC-related revenues on the budget cannot be understated. While the exact duration of these bilateral agreements remains confidential, creating immense forecasting challenges, the revenues currently support the vast majority of public expenditure.

To safeguard Naoero's economic growth and establish an effective buffer against the identified central government risks, the government will need to work towards embedding the following mitigating strategies into the medium-term fiscal framework:

Pivot Toward Fiscal Restraint: The government will strive to curb pro-cyclical spending and contain the rising wage bill. Where possible, the government has limited—and will continue to limit—new public sector hires, avoid ex gratia payments, and align compensation with sustainable revenue projections. This approach helps cool inflationary pressures and ensures compliance with fiscal responsibility ratios. The government has consistently complied with its fiscal responsibility ratio of maintaining personnel costs below 30% of current expenditures, and this will continue to be strictly observed going forward.

Maximize the Intergenerational Trust Fund (NTF): The NTF is the primary fiscal anchor to cushion the impact of eventual donor graduation and RPC scale-downs. Since contributions are structured as a share of total revenue collections, the government has successfully made increased deposits. Efforts will need to continue to maximize contributions to the NTF, ensuring that long-term returns can replace potential declines in development aid and bilateral hosting fees.

Establish Disaster & Shock Preparedness Financing: Naoero has recently enrolled in a PCRIC insurance policy to help mitigate the financial effects of drought on the island. Furthermore, the Treasury will continue to fully employ the Medium-Term Fiscal Framework (MTFF) model to stress-test scenarios, forewarning the Cabinet of any dangerous excesses to avoid in a reducing revenue climate. With support from the ADB, the government has operationalized the Environment and Climate Fund. The operationalization of this dedicated climate fund, structured separately from the central Treasury fund, is expected to attract donor funds. This creates a rules-based contingency mechanism to provide immediate liquidity in the event of natural disasters, global supply chain shocks, or spikes in commodity prices, reducing the need to deplete core budgets during crises.

Ring-fence Deep-Sea Mining Liabilities: Through the Naoero Seabed Minerals Authority (NMSA), the government has been working tirelessly with its partners to secure robust, ironclad legal protections in its sponsorship agreements. This ensures that all financial, environmental, and legal liabilities associated with deep-sea mining remain strictly with the corporate operators (NORI/TMC) and cannot be transferred to the sovereign balance sheet. This commitment will continue in the years ahead.

Reform Subsidies and Social Protection: To manage the fiscal fallout of geopolitical inflation shocks, the government will make a concerted effort to replace blanket subsidies with highly targeted social safety nets. Leveraging both Treasury and donor resources, these protections will be directed strictly toward the most vulnerable households, as necessary.

REVENUE POLICY

The revenue policy for FY 2026-27 is to capitalize on the current high-revenue environment while actively building long-term fiscal self-reliance through aggressive economic diversification. While our Bilateral Hosting Arrangements—comprising the December 2024 Treaty for Regional Processing Centre (RPC) services and the recent Third Country Resettlement Arrangements (TCRA)—continue to provide structural stability and long-term budget assurance, the policy framework explicitly recognizes that these external revenues are finite. Consequently, the framework shifts focus toward expanding alternative sovereign wealth streams to broaden Naoero's economic base. This includes optimizing the Citizenship by Investment program under the Naoero Economic and Climate Resilience Investment Program (NECRIP) and operationalizing the Command Ridge Virtual Asset Authority (CRVAA) as a secure regulator. Furthermore, domestic tax and non-tax structures will be optimized to ensure revenue collections are stable, resilient, and protected against external shocks.

The key revenue principles for FY 2026-27 are:

Secure and Stabilize Bilateral Projections: Maintain transparent management of major revenues from the RPC and TCRA, factoring in conservative variable components and adjusted cash flow timelines resulting from accounting procedural changes with the Department of Home Affairs.

Expand Alternative Sovereign Wealth: Maximize the revenue potential of the NECRIP Citizenship by Investment program through enhanced market competitiveness and strategic pricing and establish future revenue streams by operationalizing the CRVAA regulatory framework.

Diversify the Domestic Revenue Base: Implement a comprehensive Customs tariff review to increase excise duties on "sin goods"—specifically cigarettes, vapes, and sugary products—to simultaneously generate domestic revenue and improve national health outcomes.

Modernize Border Control Compliance: Enhance non-tax revenue collection by advancing the Customs modernization agenda, including the procurement of advanced X-Ray scanning machinery and the proposed construction of a new seaport Customs facility.

Sustain Primary Domestic Resources: Monitor and manage fishing license revenues prudently, normalizing projections to align with underlying trends following the conclusion of previous, non-repeating one-off collections.

Leverage Commercial Partnerships: Progress commercial arrangements to scale up mining and phosphate production with RONPhos via external funding and continue pushing for deep-sea mining exploration and licensing under existing sponsorship agreements with TMC and NORI.

EXPENDITURE POLICY

The FY 2026-27 Expenditure Policy focuses on utilizing the current high-revenue environment as a crucial point of leverage to aggressively invest in human capital, high-producing infrastructure, and commercial ventures that secure Naoero's future self-reliance. Operational spending will be carefully balanced against development needs while adhering strictly to a balanced budget stance and enhanced Public Financial Management (PFM) reforms. Expenditure policy is anchored on ensuring absolute accountability, eliminating structural wastage across government services, and aligning departmental annual operational plans with today's socioeconomic realities.

The expenditure policy is guided by the following principles:

Adherence to Fiscal Responsibility Ratios: Maintain strict compliance with mandatory fiscal thresholds, ensuring a positive budget balance, keeping personnel costs below 30 per cent of total expenditure, and holding a liquidity cash buffer of at least two months of non-RPC expenditure.

Fortify Generational Savings and Debt Sustainability: Guarantee the mandatory contribution of 10.1 per cent of adjusted revenue (\$23.7 million) to the Naoero Intergenerational Trust Fund, capitalize Fund 2, and strictly enforce the new Debt Act by restricting any new borrowings to highly concessional capital projects with a clear business case.

Deliver Targeted and Sustainable Social Safety Nets: Deploy finite cost-of-living interventions—including fuel buffers, Naoero Utilities Corporation lifeline electricity tariff support, and sea freight bank guarantees—while modernizing social protection programs and pension rates in strict alignment with the local context and ADB recommendations.

Demand Compliance and Results in Education: Maintain Education as Naoero's highest sectoral allocation (\$20.5 million), focusing funding on core curriculum, vocational pathways (VTPD), and Re-Engagement Programs, while completely discontinuing ineffective, non-enforced legacy schemes like NEAT and Back-to-School.

Balance Clinical Excellence with Regulatory Oversight: Optimize clinical healthcare delivery through the GMSS Public-Private Partnership (\$26 million), while fully funding the new Regulatory Health Department (\$4.2 million) to enforce the Health and Medical Services Act 2025 and supporting Public Health as a standalone government department focused on preventative care.

Drive Public Sector Efficiency and Reduce Wastage: Actively eliminate operational inefficiencies across government operations, notably through the procurement of an Electric Vehicle (EV) bus fleet (\$4.7 million) to replace the financially unsustainable, oversized public vehicle fleet.

Enforce Commercial Discipline across State-Owned Enterprises (SOEs): Rigorously monitor SOE financial viability to reduce reliance on government subsidies, utilizing enhanced technical assistance from the Public Enterprise Monitoring Unit (PEMU) and continuing mandatory budget performance reviews.

Invest in Productive, Climate-Resilient Capital Infrastructure: Channel resources into high-yielding national infrastructure assets—including the Sustainable and Climate-Resilient Port maintenance fund (\$28 million sinking fund), the NUC 6MW solar project, runway resurfacing (\$49.4 million), and essential national asset construction (State House, Justice building, and the Canberra chancery)—subject to rigorous feasibility and cost-benefit.

REVENUE

Government revenue collections remain underpinned by our bilateral hosting agreements, providing structural stability and reliable forecasting.

Total revenue for FY 2026–2027 is estimated at \$359.2 million, maintaining a comparable baseline to the previous financial year.

Domestic revenue streams and international partnerships continue to support fiscal resilience, bolstered by direct budget support under the bilateral Treaty with Australia, policy-based grants from the Asian Development Bank and New Zealand, and expanding alternative revenues from the Naoero Economic and Climate Resilience Investment Program (NECRIP).

CHART 1.3: REVENUE AGGREGATES

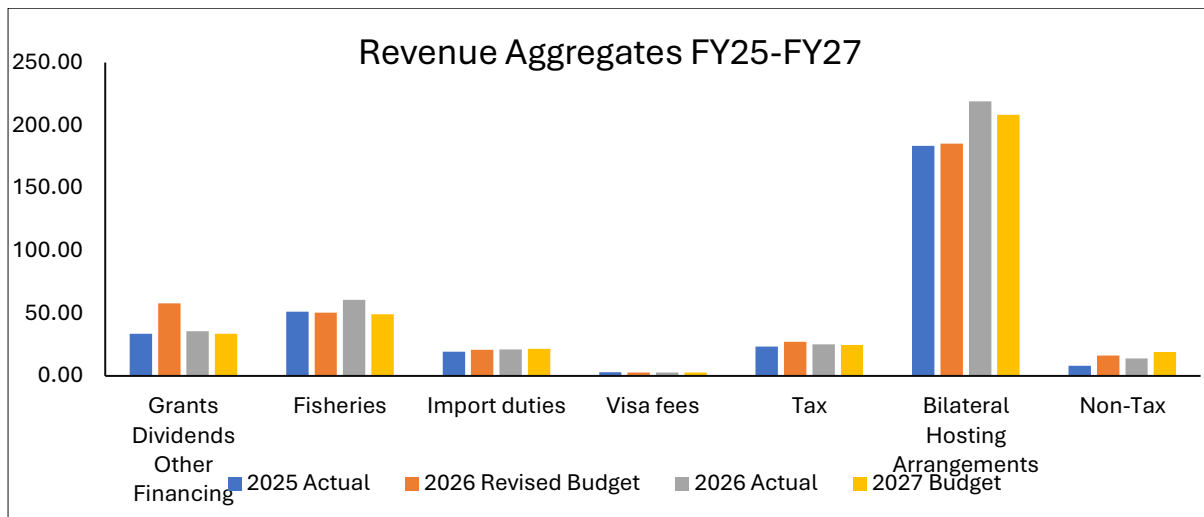

TABLE 1.10: REVENUE AGGREGATES

Revenue Description	2024-25 Preliminary Actual \$	2025-26 Approved Budget \$	2025-26 Revised Budget \$	2025-26 YTD Actual \$	2026-27 Approved Budget \$	Share of Total Budget %
Grants Dividends Other Financing	33,657,344	57,200,000	57,953,200	35,666,777	33,700,000	9%
Fisheries	51,342,170	50,530,000	50,530,000	60,786,287	49,178,798	14%
Import duties	19,191,618	20,782,975	20,782,975	21,017,059	21,648,544	6%
Visa fees	2,876,267	2,775,910	2,775,910	2,593,659	2,673,336	1%
Tax	23,342,220	27,186,794	27,186,794	25,192,615	24,796,000	7%
Bilateral Hosting Arrangements	183,428,038	185,343,936	236,843,936	218,928,070	208,209,807	58%
Non-Tax	8,148,406	14,769,979	16,269,979	13,967,963	18,991,933	5%

Bilateral Hosting Arrangements continue to be the primary revenue driver, accounting for \$208.2 million (58%) of the total budget. This comprises \$151.7 million from the Regional

Processing Centre (RPC)—reflecting conservative variable fee estimates and adjusted cash flow timing with the Department of Home Affairs—and \$56.5 million from the Third Country Resettlement Arrangements (TCRA).

FISHERIES REVENUE

Fisheries revenue remains Naoero's second largest domestic revenue contributor, estimated at \$49.2 million (14% of the total budget). Projections have been adjusted slightly downward compared to the last financial year, as the budget normalizes and does not anticipate a recurrence of the previous year's one-off collections.

TABLE 1.11: FISHERIES REVENUE

Total Fisheries Revenue	51,342,170	50,530,000	50,530,000	60,786,287	49,178,798

TAX REVENUE

Tax revenue estimates for FY 2026–2027 remain tightly aligned with current domestic business conditions. The government continues to focus on maintaining a stable tax base while preparing for the implementation of a reviewed Customs tariff structure designed to introduce higher excise and duties on "sin goods," such as tobacco, vapes, and high-sugar items, to support both revenue diversification and national health outcomes.

TABLE 1.12: TAX REVENUE

Description	2024-25 Preliminary Actual \$	2025-26 Approved Budget \$	2025-26 Revised Budget \$	2025-26 YTD Actual \$	2026-27 Approved Budget \$

Total Tax	23,342,220	27,186,794	27,186,794	25,192,615	24,796,000

CUSTOMS DUTIES

Customs duties are projected to increase to \$21.6 million (6% of the total budget). This upward revision reflects an improving domestic commercial environment and stronger collection enforcement driven by the ongoing modernization of customs infrastructure and the continued rollout of the ASYCUDA compliance system.

TABLE 1.13: CUSTOMS DUTIES

VISA REVENUE

Visa revenue is estimated at \$2.7 million, representing approximately 1 per cent of total projected government revenue for the financial year. Collections are expected to remain stable, supported by steady business activity and established operational levels within the hosting sectors.

TABLE 1.14: VISA REVENUE

Description	2024-25 Preliminary Actual \$	2025-26 Approved Budget \$	2025-26 Revised Budget \$	2025-26 YTD Actual \$	2026-27 Approved Budget

Total Visa Fees	2,876,267	2,775,910	2,775,910	2,593,659	2,673,336

GRANTS, DIVIDENDS AND FINANCING

Total revenue from Grants, Dividends, and Financing is projected at \$33.3 million (9% of the total budget). This includes \$31.5 million in direct bilateral budget support from the Government of Australia under the Treaty, alongside an \$8.5 million Policy-Based Grant co-

financed by the Asian Development Bank (\$7.0 million) and the Government of New Zealand (\$1.5 million). The ADB is further providing \$3.0 million in emergency response financing to mitigate the global fuel crisis. State-Owned Enterprise (SOE) dividend returns are normalized at \$2.0 million, comprising \$1.8 million from CENPAC Corporation and \$0.2 million from Eigigu Procurement Limited (EPL).

TABLE 1.15: DIVIDENDS, GRANTS AND OTHER FINANCING

Description	2024-25 Preliminary Actual \$	2025-26 Approved Budget \$	2025-26 Revised Budget \$	2025-26 YTD Actual \$	2026-27 Approved Budget \$
1015 - Income from Investments & Dividends-Others	3,232	7,200,000	7,953,200	1,166,777	2,200,000

Total Dividends , Grants and Other	33,657,344	57,200,000	57,953,200	35,666,777	33,700,000

BILATERAL HOSTING ARRANGEMENTS

Bilateral Hosting Arrangements remain our most significant revenue source and make up the RPC Direct aggregate, accounting for \$208.2 million (58% of the total budget). This revenue comprises two main components:

Regional Processing Centre (RPC) – \$151.7 million: This figure is lower than the last financial year. The variance is primarily due to shifting cash flow timing resulting from changed accounting procedures by the Department of Home Affairs (DHA), alongside a more conservative estimate for the variable fee component.

Third Country Resettlement Arrangements (TCRA) – \$56.5 million: This includes the remaining six months of TCRA fees, the annual operational support fund, the program capability delivery fund, and a partial interest drawdown from the TCRA hosting endowment fund.

TABLE 1.16: NON-TAX REVENUE

Description	2024-25 Preliminary Actual \$	2025-26 Approved Budget \$	2025-26 Revised Budget \$	2025-26 YTD Actual \$	2026-27 Approved Budget \$
1495 - Service Fees	20,003,434	20,003,004	20,003,004	18,336,277	18,335,337

Total RPC Direct	183,428,038	185,343,936	236,843,936	218,928,070	208,209,807

NON-TAX REVENUE

Non-tax revenue is estimated at \$19.4 million (6% of the total budget), encompassing regulatory fees, fines, and departmental charges. The primary driver within this category is the \$9.0 million projection from the Citizenship by Investment program (NECRIP), which enters its second full year of operations as a rapidly growing alternative sovereign wealth stream.

TABLE 1.17: NON-TAX REVENUE

EXPENDITURE

Total appropriated expenditure for the FY 2026–2027 Budget is established at \$359.0 million, yielding a conservative budget surplus of \$0.2 million. In line with the government's strict commitment to its Fiscal Responsibility Ratios, resources are aggressively prioritized toward education, productive infrastructure, the maintenance of essential public services, and fortified social safety nets, while ensuring personnel costs remain strictly below 30 per cent of total expenditure.

CHART 1.4: EXPENDITURE AGGREGATES

The total ceiling amount was established at \$300.6 million. However, after consultations with the Minister and consideration along with New Project Proposals, the approved expenditure at the end of the budget rounds amounted to \$359 million.

PERSONNEL COSTS

Personnel-related costs are structured to support critical public service needs while maintaining fiscal restraint. The budget accommodates a \$0.5 million targeted salary increase for the Naoero Police Force to account for expanding mandates, alongside \$0.1 million for a new Judiciary Research Associate to support the Chief Justice. General personnel allocations remain well within the mandatory 30 per cent fiscal ceiling.

GOVERNMENT TRAVEL

Government travel expenses are allocated at \$8.4 million for the financial year. To maintain strict fiscal discipline, control, and transparency, the travel budget remains centralized under the Presidency office for all departments (\$4.0 million), with \$3.4 million allocated separately for Presidency and Ministerial executive business travel. All departments will continue to adhere to the centralized approval procedures enforced over the past two years.

SUBSIDIES AND DONATIONS

Subsidies and donations have been strategically re-aligned to protect households from global inflation and high energy costs. Key measures include a \$25.3 million for Eigigu Solutions and support for SoEs.

TABLE 1.23: SUBSIDIES AND DONATIONS

CAPITAL EXPENDITURE

Capital expenditure focuses on high-producing infrastructure and core national assets. Treasury-funded infrastructure allocations include \$4.3 million for the commencement of the TCRA housing project for transferee accommodation, \$1.6 million to fully finalize the long-standing Canberra chancery project, \$1.1 million to finish construction on the new government building housing the Office of the President, Cabinet, and Finance, and \$0.3 million for remaining works on the Department of Justice and Border Control building.

TABLE 1.24: CAPITAL EXPENDITURE

SOCIAL BENEFITS

Social benefit allocations focus heavily on strengthening targeted safety nets and improving living standards. The budget accommodates the first full year of the revised, elevated elder pension rates (\$400 to \$600 based on age bracket; \$1,000 for Truuk returnees). To support community resettlement, \$1.6 million is provided for Redzone housing infrastructure alongside \$1.1 million for temporary rental accommodations. \$5.7 million is allocated to support the scholarship program for Department of Education for the 2027 cohort and continuation of the Hammer De-Robert Inservice scholarship under the Presidency department.

Non-expense Items

Non-expense estimates reflect major milestones in national debt reduction and long-term savings. Following the full settlement of the Naoero Airline EXIM Bank loan and the validation of Bank of Naoero liquidation claims, the national Debt-to-GDP ratio has fallen to 2.3 per cent. The budget provides \$1.0 million for ongoing Bank of Naoero debt amortization. The statutory contribution to the Naoero Intergenerational Trust Fund is set at \$24.3 million (10.1% of adjusted revenue), with \$22.3 million to be settled in FY 2026–2027 following a \$2.0 million pre-payment made in the previous financial year.

Government Operations

Government Operations constitute the largest operational component of the budget, heavily driven by contractual services. A primary allocation is \$26.0 million for the clinical health Public-Private Partnership (PPP) with GMSS, categorized under the Salary Other Contracts line, alongside security and other service agreements. Other major specific expenditures

include \$6.4 million for Repairs and Maintenance (R&M) of Plant and \$5.0 million for overseas medical referrals. Additionally, this category accounts for significant rental expenditures—comprising housing, office, and land leases—as well as grants to extra-budgetary units and essential operational costs such as utilities, telecommunications, and local transport.
